

TECHNICAL RESCUE SERVICES

High Angle Rescue

Any time you have workers at elevated areas, there is always the possibility for serious injuries to occur. Target Safety Services Ltd. has developed a strong “TEAM” of high angle rescue personnel that have the technical training and experience to provide you with relevant planning to perform the job safely. Experience, combined with the continuous training, ensures our team is capable of any and all rescue situations.

Confined Space Entry Rescue

There are risks associated with entering a confined space – hazardous gases, explosive situations just to name a few. Target understands the risk associated with this task. The Rescue Team of Target Safety Services Ltd. has received all the technical training and hands on experience to assist the client in developing pre-entry plans and performing hazard assessments.

Medical Teams

An “Emergency Response Team” (ERT) system is utilized onsite to ensure the function of High Angle Rescue and Confined Space Entry Rescue is reliable, expert, and safe should an incident occur that requires this form of response.
