

Technical Rescue Services

High Angle Rescue

There are risks associated with working in elevated areas. Target Safety Services has a strong team of high angle rescue personnel that have the technical training, knowledge, experience and expertise to perform rescues and provide relevant planning to help you complete high angles job safely.

Confined Space Entry Rescue

Confined spaces present unique and complex risks including hazardous gases and explosive situations. Target's Rescue Teams have received all the technical training and hands on experience to complete rescues, pre-entry plans and hazard assessments.

Medical Teams

We can supply medical professionals if required.
